Subject Index

Volume 17 (1980)

The key words given at the end of the summary of each article have been classified as primary and secondary key words separated by a semicolon. In the index the primary key words are listed alphabetically; the individual primary key words are permuted in such way that each of them appears in first place once. The secondary key words follow the primary ones without permutation.

A

acebutolol, renal failure, dialysis; pharmacokinetics, N-acetylmetabolite, 339
activated charcoal, phenobarbitone, carbamazepine, phenylbutazone; absorption, elimination, acute intoxication, 51
adriamycin, methotrexate, citrovorum factor, cyclophosphamide, bleomycin; protein binding competitive binding, 123
adverse drug reactions, digitalis intoxication, antibiotic reactions; drug utilization, hospital admissions, clinical adverse effects, 25
alcohol, diphenhydramine; combined drug-alcohol treatment, behavioral measures, performance, 259
alcuronium; single dose, multiple dose, plasma levels, neuromuscular response, pharmacokinetics, anaesthesia, 449
aminophylline, theophylline, obstructive lung disease; microcrystalline, bioavailability, pharmacokinetics, 379
antibiotic reactions, adverse drug reactions, digitalis intoxication; drug utilization, hospital admissions, clinical adverse effects, 25
antidepressants, zimelidine, norzimelidine; pharmacokinetics, bioavailability, 111
antihypertensive therapy, sleep disturbances, depression; nightmares, population study, women, 173
antipyrine clearance, cytochrome P-450, glucaric acid, cirrhosis; hepatic drug metabolism, healthy volunteers, 267
asthma, theophylline; dosage calculations, dosage adjustment, hand-held calculator programs, 393
atenolol, chlorthalidone, hypertension; chronic treatment, co-administration, plasma half-life, urine half-life, 333
atrial fibrillation, digoxin; digoxin concentrations in right atrium, skeletal muscle, serum, sinus rhythm, man, 243

B

beta-adrenoceptor antagonists, propranolol, radioreceptor assay; lung membranes, plasma level, healthy volunteers, 349
beta-blocker, metoprolol; slow-release formulation, multiple dosing, blood pressure, heart rate, pharmacokinetics, healthy volunteers, 87
bezafibrate, clofibrate; steady-state kinetics, cumulation, healthy volunteers, 305
bleomycin, methotrexate, citrovorum factor, cyclophosphamide, adriamycin; protein binding competitive binding, 123
blood cholesterol, hypolipidemic drugs; regression to the mean, clinical trial, design, before-after measurements, 227

C

caffeine, idrocilamide, xanthine derivatives; inhibition of metabolism, neuropsychiatric side effects, pharmacokinetics, healthy man, 37
carbamazepine, activated charcoal, phenobarbitone, phenylbutazone; absorption, elimination, acute intoxication, 51
carbimazole, propylthiouracil, propranolol, methimazole; comparative activity, pharmacokinetics, bioactivation, thyroid peroxidase inhibition, 295
carbonic anhydrase binding, chlorthalidone; pharmacokinetic model, distribution in blood, 203
cefuroxime, co-trimoxazole, tetracycline; drug monitoring, bacterial sensitivities, Klebsiella selection, 101
chlormethiazole, cirrhosis of the liver; antipyrine, protein binding, pharmacokinetics, healthy volunteers, 275
chlorpropramide, tolbutamide; kinetics, food, age, blood glucose, plasma insulin, 285
chlorthalidon, hydrochlorthiazide, furosemide; adverse reaction, plasma cholesterol, plasma triglycerides, 251
chlorthalidone, atenolol, hypertension; chronic treatment, co-administration, plasma half-life, urine half-life, 333
chlorthalidone, carbonic anhydrase binding; pharmacokinetic model, distribution in blood, 203
cholestasis, hexobarbital, phenobarbital, rifampicin, phenytonin; pharmacokinetics, drug metabolism, induction, 197
circadian rhythm, plasma cortisol, desoximetasone, triamcinolone acetonide; topical use, radioimmunoassay, frequency distribution analysis, patients, 363
cirrhosis, cytochrome P-450, antipyrine clearance, glucaric acid; hepatic drug metabolism, healthy volunteers, 267
cirrhosis of the liver, chlormethiazole; antipyrine, protein binding, pharmacokinetics, healthy volunteers, 275
citrovorum factor, methotrexate, cyclophosphamide, adriamycin, bleomycin; protein binding competitive binding, 123
clinical trial, placebo; ethics of experimentation, drug efficacy, 157
clinical trials, drug efficacy, placebo; trial design, appropriate controls, 79
clofibrate, bezafibrate; steady-state kinetics, cumulation, healthy volunteers, 305
clofibrate, diabetes mellitus; glucose tolerance, cholesterol, triglyceride, fibrinogen, 355
colestipol, fenofibrate, fenofibric acid; pharmacokinetics, interaction, volunteers, 459
congestive heart failure, prazosin; pharmacokinetics, oral dose, comparison with healthy volunteers, 425
co-trimoxazole, cefuroxime, tetracycline; drug monitoring, bacterial sensitivities, Klebsiella selection, 101
cyclophosphamide, methotrexate, citrovorum factor, adriamycin, bleomycin; protein binding competitive binding, 123
cytochrome P-450, antipyrine clearance, glucaric acid, cirrhosis; hepatic drug metabolism, healthy volunteers, 267

D

dapsone, salivary drug elimination; pharmacokinetics, acetylator phenotype, 129
debrisoquine 4-hydroxylation, sparteine N-oxidation; pharmacogenetics, debrisoquine metabolism, 153
depression, antihypertensive therapy, sleep disturbances; nightmares, population study, women, 173
desoximetasone, plasma cortisol, circadian rhythm, triamcinolone acetonide; topical use, radioimmunoassay, frequency distribution analysis, patients, 363
diabetes mellitus, clofibrate; glucose tolerance, cholesterol, triglyceride, fibrinogen, 355
dialysis, acebutolol, renal failure; pharmacokinetics, N-acetylmetabolite, 339
digitalis intoxication, adverse drug reactions, antibiotic reactions; drug utilization, hospital admissions, clinical adverse effects, 25

digoxin

digoxin; enteric coating, absorption, radioimmunoassay, urinary digoxin, plasma digoxin, 443
digoxin, atrial fibrillation; digoxin concentrations in right atrium, skeletal muscle, serum, sinus rhythm, man, 243
diphenhydramine, alcohol; combined drug-alcohol treatment, behavioral measures, performance, 259
disopyramide; biovailability, controlled-release tablets, pharmacokinetics, 209
dopamine-beta-hydroxylase, L-threo-dihydroxyphenylserine, octopamine, familial amyloid, norepinephrine, polyneuropathy; denervation supersensitivity, autonomic dysfunction, 429
drug efficacy, clinical trials, placebo; trial design, appropriate controls, 79
drug utilisation, prescribing habits; hypnotics, sedatives, minor tranquillisers, defined daily doses, therapeutic audit, 183

E

echinococcosis, mebendazole; bioavailability, absorption, concomitant eating, plasma level, 375
epileptic patients, sodium valproate; pharmacokinetics, plasma concentration, prediction, maintenance dosage, 71
essential hypertension, labetalol; thermodilution, pulmonary circulation, haemodynamics, 5

F

familial amyloid, L-threo-dihydroxyphenylserine, octopamine, norepinephrine, dopamine-beta-hydroxylase, polyneuropathy; denervation supersensitivity, autonomic dysfunction, 429
fenofibrate, colestipol, fenofibric acid; pharmacokinetics, interaction, volunteers, 459
fenofibric acid, colestipol, fenofibrate; pharmacokinetics, interaction, volunteers, 459
flunitrazepam; prolonged administration, pharmacokinetics, clinical, observations, sleep parameters, 189
flunitrazepam, zopiclone, nitrazepam, flurazempam; preoperative anxiety, double-blind trial, 93
flurazempam, zopiclone, nitrazepam, flunitrazepam; preoperative anxiety, double-blind trial, 93
furosemide, hydrochlorthiazide, chlorthalidon; adverse reaction, plasma cholesterol, plasma triglycerides, 251
furosemide, piretanide, nephrotic syndrome; loop diuretic, natriuresis, free water clearance, 165

G

gallamine; single dose, multiple dose, plasma levels, neuromuscular response, 135
gallamine; single dose, plasma levels, a-v differences, neuromuscular response, 145
glucaric acid, cytochrome P-450, antipyrine clearance, cirrhosis; hepatic drug metabolism, healthy volunteers, 267
glucose, propranolol, schizophrenia; glucose tolerance test, blood glucose, plasma propranolol, 415
gonadal hormones, reserpine, hydrochlorothiazide, pituitary hormones, hypertension; serum concentration, antihypertensive therapy, 329
Graves disease, triiodothyronine; phagocytosis, chemiluminescence, antibody-dependent cell-mediated cytotoxicity, lymphocyte transformation, 19

H

hexobarbital, cholestasis, phenobarbital, rifampicin, phenytonin; pharmacokinetics, drug metabolism, induction, 197
hydrochlorothiazide, reserpine, pituitary hormones, gonadal hormones, hypertension; serum concentration, antihypertensive therapy, 329
hydrochlorthiazide, chlorthalidon, furosemide; adverse reaction, plasma cholesterol, plasma triglycerides, 251
hypertension, atenolol, chlorthalidone; chronic treatment, co-administration, plasma half-life, urine half-life, 333
hypertension, metoprolol; pharmacokinetics, plasma renin, blood pressure effects, 321
hypertension, nifedipine; blood pressure, heart rate, plasma renin activity, aldosterone, clinical trial, 161
hypertension, penbutolol, propranolol; double-blind crossover comparison, blood pressure, heart rate, 409
hypertension, reserpine, hydrochlorothiazide, pituitary hormones, gonadal hormones; serum concentration, antihypertensive therapy, 329
hypertension, timolol; dose ranging, double-blind trial, 239
hypolipidemic drugs, blood cholesterol; regression to the mean, clinical trial, design, before-after measurements, 227

I

idrocilamide, caffeine, xanthine derivatives; inhibition of metabolism, neuropsychiatric side effects, pharmacokinetics, healthy man, 37
indomethacin, rheumatoid arthritis; double-blind cross-over study, placebo, clinical effect, technetium uptake, plasma concentration, 437

K

ketobemidone; narcotic analgesic, N,N-dimethyl-3,3-diphenyl-1-methylallylamine chloride, pharmacokinetics, 45

L

labetalol, essential hypertension; thermodilution, pulmonary circulation, haemodynamics, 5
L-dopa; elderly, pharmacokinetics, bioavailability, 215
L-threo-dihydroxyphenylserine, octopamine, familial amyloid, norepinephrine, dopamine-beta-hydroxylase, polyneuropathy; denervation supersensitivity, autonomic dysfunction, 429

M

mebendazole, echinococcosis; bioavailability, absorption, concomitant eating, plasma level, 375
mefruside; metabolite kinetics, human pharmacokinetics, urine concentration, 59
metergoline, serotonin, methysergide, metoclopramide; gastric acid secretion, gastrin secretion, 13
methimazole, propylthiouracil, propranolol, carbimazole; comparative activity, pharmacokinetics, bioactivation, thyroid peroxidase inhibition, 295
methotrexate, citrovorum factor, cyclophosphamide, adriamycin, bleomycin; protein binding competitive binding, 123
methotrexate, renal clearance; nonlinear pharmacokinetics, methotrexate-RIA, patients, 371
methysergide, serotonin, metergoline, metoclopramide; gastric acid secretion, gastrin secretion, 13
metoclopramide, serotonin, methysergide, metergoline; gastric acid secretion, gastrin secretion, 13
metoprolol, beta-blocker; slow-release formulation, multiple dosing, blood pressure, heart rate, pharmacokinetics, healthy volunteers, 87
metoprolol, hypertension; pharmacokinetics, plasma renin, blood pressure effects, 321
myocardial infarction, reinfarction; clinical trial, 401

N

nephrotic syndrome, piretanide, furosemide; loop diuretic, natriuresis, free water clearance, 165
nifedipine, hypertension; blood pressure, heart rate, plasma renin activity, aldosterone, clinical trial, 161

nitrazepam, zopiclone, flurazempam, flunitrazepam; preoperative anxiety, double-blind trial, 93
nomogram, phenytoin; serum concentration, steady-state, 33
noradrenaline, tyramine, phenylephrine; pressor response test, re-uptake, adrenergic receptor, 233
norepinephrine, L-threo-dihydroxyphenylserine, octopamine, familial amyloid, dopamine-beta-hydroxylase, polyneuropathy; denervation supersensitivity, autonomic dysfunction, 429
norzimelidine, zimelidine, antidepressants; pharmacokinetics, bioavailability, 111

O

obstructive lung disease, theophylline, aminophylline; microcrystalline, bioavailability, pharmacokinetics, 379
octopamine, L-threo-dihydroxyphenylserine, familial amyloid, norepinephrine, dopamine-beta-hydroxylase, polyneuropathy; denervation supersensitivity, autonomic dysfunction, 429
oxazepam, oxazepam glucuronide, placental transfer; fetal drug level, pregnancy, 301
oxazepam glucuronide, oxazepam, placental transfer; fetal drug level, pregnancy, 301
oxprenolol, propranolol, sotalol; slow release preparation, plasma level, exercise tachycardia, 419

P

paracetamol; suppository, tablets, bioavailability, 465
penbutolol, hypertension, propranolol; double-blind crossover comparison, blood pressure, heart rate, 409
phenobarbital, hexobarbital, cholestasis, rifampicin, phenytonin; pharmacokinetics, drug metabolism, induction, 197
phenobarbitone, activated charcoal, carbamazepine, phenylbutazone; absorption, elimination, acute intoxication, 51
phenylbutazone, activated charcoal, phenobarbitone, carbamazepine; absorption, elimination, acute intoxication, 51
phenylephrine, tyramine, noradrenaline; pressor response test, re-uptake, adrenergic receptor, 233
phenytoin, nomogram; serum concentration, steady-state, 33
phenytonin, hexobarbital, cholestasis, phenobarbital, rifampicin; pharmacokinetics, drug metabolism, induction, 197
piretanide, furosemide, nephrotic syndrome; loop diuretic, natriuresis, free water clearance, 165
pituitary hormones, reserpine, hydrochlorothiazide, gonadal hormones, hypertension; serum concentration, antihypertensive therapy, 329
placebo, clinical trial; ethics of experimentation, drug efficacy, 157
placebo, clinical trials, drug efficacy; trial design, appropriate controls, 79
placental transfer, oxazepam, oxazepam glucuronide; fetal drug level, pregnancy, 301
plasma cortisol, circadian rhythm, desoximetasone, triamcinolone acetonide; topical use, radioimmunoassay, frequency distribution analysis, patients, 363
polyneuropathy, L-threo-dihydroxyphenylserine, octopamine, familial amyloid, norepinephrine, dopamine-beta-hydroxylase; denervation supersensitivity, autonomic dysfunction, 429
prazosin, congestive heart failure; pharmacokinetics, oral dose, comparison with healthy volunteers, 425
prenalterol; beta1-adrenoceptor agonist, metabolic effects, pharmacokinetics, 81
prescribing habits, drug utilisation; hypnotics, sedatives, minor tranquillisers, defined daily doses, therapeutic audit, 183
probenecid; metabolites, CSF levels, plasma levels, CSF-blood transport, 223
propranolol, glucose, schizophrenia; glucose tolerance test, blood glucose, plasma propranolol, 415
propranolol, oxprenolol, sotalol; slow release preparation, plasma level, exercise tachycardia, 419
propranolol, penbutolol, hypertension; double-blind crossover comparison, blood pressure, heart rate, 409
propranolol, propylthiouracil, carbimazole, methimazole; comparative activity, pharmacokinetics, bioactivation, thyroid peroxidase inhibition, 295
propranolol, radioreceptor assay, beta-adrenoceptor antagonists; lung membranes, plasma level, healthy volunteers, 349
propylthiouracil, propranolol, carbimazole, methimazole; comparative activity, pharmacokinetics, bioactivation, thyroid peroxidase inhibition, 295

R

radioreceptor assay, propranolol, beta-adrenoceptor antagonists; lung membranes, plasma level, healthy volunteers, 349
reinfarction, myocardial infarction; clinical trial, 401
renal clearance, methotrexate; nonlinear pharmacokinetics, methotrexate-RIA, patients, 371
renal failure, acebutolol, dialysis; pharmacokinetics, N-acetylmetabolite, 339
reserpine, hydrochlorothiazide, pituitary hormones, gonadal hormones, hypertension; serum concentration, antihypertensive therapy, 329
rheumatoid arthritis, indomethacin; double-blind cross-over study, placebo, clinical effect, technetium uptake, plasma concentration, 437
rifampicin, hexobarbital, cholestasis, phenobarbital, phenytonin; pharmacokinetics, drug metabolism, induction, 197
ritodrine; radioimmunoassay, placental transfer, plasma level, 117

S

salivary drug elimination, dapsone; pharmacokinetics, acetylator phenotype, 129
schizophrenia, propranolol, glucose; glucose tolerance test, blood glucose, plasma propranolol, 415
serotonin, methysergide, metergoline, metoclopramide; gastric acid secretion, gastrin secretion, 13
sleep disturbances, antihypertensive therapy, depression; nightmares, population study, women, 173
sodium valproate, epileptic patients; pharmacokinetics, plasma concentration, prediction, maintenance dosage, 71
sodium valproate, valproic acid; suppositories, micro-enemas, steady-state concentration, absorption, bioavailability, 309
sotalol, oxprenolol, propranolol; slow release preparation, plasma level, exercise tachycardia, 419
sparteine N-oxidation, debrisoquine 4-hydroxylation; pharmacogenetics, debrisoquine metabolism, 153
sulpiride; pharmacokinetics, serum clearance, renal clearance, bioavailability, healthy volunteers, 385

T

tetracycline, co-trimoxazole, cefuroxime; drug monitoring, bacterial sensitivities, Klebsiella selection, 101
theophylline, aminophylline, obstructive lung disease; microcrystalline, bioavailability, pharmacokinetics, 379
theophylline, asthma; dosage calculations, dosage adjustment, hand-held calculator programs, 393
timolol, hypertension; dose ranging, double-blind trial, 239
tolbutamide, chlorpropramide; kinetics, food, age, blood glucose, plasma insulin, 285
triamcinolone acetonide, plasma cortisol, circadian rhythm, desoximetasone; topical use, radioimmunoassay, frequency distribution analysis, patients, 363
triiodothyronine, Graves disease; phagocytosis, chemiluminescence, antibody-dependent cell-mediated cytotoxicity, lymphocyte transformation, 19
tyramine, noradrenaline, phenylephrine; pressor response test, re-uptake, adrenergic receptor, 233

V

v

valproic acid, sodium valproate; suppositories, micro-enemas, steady-state concentration, absorption, bioavailability, 309
viloxazine; blood brain barrier, CSF levels, plasma levels, 179

X

xanthine derivatives, caffeine, idrocilamide; inhibition of metabolism, neuropsychiatric side effects, pharmacokinetics, healthy man, 37

Z

zimelidine, norzimelidine, antidepressants; pharmacokinetics, bioavailability, 111
zopiclone, nitrazepam, flurazempam, flunitrazepam; preoperative anxiety, double-blind trial, 93
